

Pearson Edexcel Level 3 Certificate in Assessing Vocational Achievement

The Pearson Edexcel Level 3 Certificate in Assessing Vocational Achievement is suitable for those who assess both occupational competence in the work environment and vocational skills, knowledge and understanding in environments other than the workplace (e.g. a workshop, classroom or other training environment).

This qualification has been designed to meet the needs of the developing qualification frameworks and to reflect changes in the practice of assessment. This qualification will be required for any assessors and verifiers involved in NVQs and would be helpful for teachers in schools who deliver vocational qualifications with applied learning, such as BTEC Firsts and Nationals.

This qualification is for learners aged 19 and above who are capable of reaching the required standards in a learning and development delivery or assessment context. The awarding bodies policy is that the qualification should be free from any barriers that restrict access and progression and ensure equality of opportunity for all wishing to access the qualifications.

The learner will need to meet the requirements outlined below before Pearson can award the qualification:

- Understanding the Principles and Practices of Assessment
- Assess Occupational Competence in the Work Environment
- Assess Vocational Skills, Knowledge and Understanding
